Description	
Stealing arrows from a target in the soldier camp is a "bad" idea. The soldiers attack without warning (and try to kill you). This should not be a crime forbidden under penalty of death.	
Where can I find the version(number) of the beta?

I took an arrow from the camp as well yesterday, 5/28/2016 and only had to pay a small fine. However, today (5/29/2016) I picked up one of my own arrows and the whole camp tried to kill me.

hi there,

The soldiers in the camp tend to be bit harsh.

It will surely work different in the future.
