The reason i updated the Drivers where Little delays of ,5 sec. when playing. This is a known nvidia bug in the Driver and i hope that the update fix These Problem but now i can't Play the game anymore also with older Driver versions.

Hi there,

I believe that this might not be a problem of the driver update, but of corrupted saved game.

Try deleting (or moving) your saved game, which you can find at: "game folder"/user\_kingdomcome/whgame"

#### #3 - 09/16/2016 08:20 PM - Backer gordonw1985

After renaming in same folder the System completely crashes...

After moving the \_whgame folder to desktop and creating a new game it works.

Thank you very much for fast answer.
