

Kingdom Come: Deliverance - Bug #609

Launcher bug: error 0x3E8

01/16/2017 11:21 PM - Backer mistersquid

Status: Investigating	
Priority: Normal	
Assignee:	
Category:	
Steam or Launcher: Launcher	
Description	
Hi/Bonjour,	
When i start the installation, i get this message: unknown bundle setup error: 0x3E8 I have updated my SP1 windows 7 but that doesn't fixed the problem.	
<i>french: Quand je lance l'installation du jeu, un message s'affiche: unknown bundle setup error: 0x3E8 J'ai mis à jour le SP1 de windows 7 mais ça n'a pas résolu le problème.</i>	
I found that: KCD_Beta_Access_20170116180951	
Can anyone help me please ?

Hello,

looking into the log you sent, it says:

"The Burn engine cannot run with an MBA under the .NET 4 CLR on Windows 7 RTM with .NET 4.5.2 (or greater) installed"

It simply means that you need SP1, are you sure you installed it correctly? If you right-click "my computer" icon and chose "properties" you should see the version of the system installed.
