

Kingdom Come: Deliverance - Bug #616

Game Installtion: Unknown bundle setup error =

01/26/2017 09:09 AM - Backer happilyinsane

Status: New	
Priority: Normal	
Assignee: Martin Šourek	
Category:	
Steam or Launcher: Launcher	
Description	
Have now been unable to download the game for nearing a day solid with constant attempts at fixing.	
There are a couple of issues I shall describe in case they are linked.	
Begining of installtion: Unkown bunle setup error: 0x3E8	
During installtion: Constantly stopping with me having to click "retry" (of some sort to continue the installtion after it pauses/crashes every .5%)	
Have once made it past both of these only for the installtion to fail with a missing .dll of some sort	
(attaching logs not sure if correct or not.)	
Thanks. Chris.
