I downloaded the newest launcher version from kingdomcomerpg.com, the issue remains. About my internet connection - I experienced no issues on any other sites/games/services. In the similar tickets I saw an instruction to open this site in IE (<https://r6j3q5x3.map2.ssl.hwcdn.net/file.txt>). The file was opened without any issues on Internet Explorer.

Resolved - new launcher version fixed the issue. Thank you. :)
