Description	
<p>With the game version 1.4.1 the game crashes during the quest "Pestilence" in Merhojed. After i've healed the plague i can talk with the captured bandit in the barn. After the dialog the game crash with "app no longer working". I think the following cutscene is the problem. It seems to be a loading error.</p>

Edit:
Earlier in this quest - during the search about infos about the pestilence - the game crashes in the house of stroh (Cutsceene) too!
